

Discover Your Positive Influence With the Help of Chevy and IBM Watson

New Initiative Celebrates International Day of Positive Thinking, Evaluates Positivity Based on Social Media Activity

DETROIT and NEW YORK CITY - 14 Sep 2016: Have you ever stopped to consider the positivity you bring to your friends, family or greater community? With September's "International Day of Positive Thinking" in mind, Chevrolet enlisted the cognitive capabilities of IBM's (NYSE: [IBM](#)) Watson platform to develop the Chevrolet Global Positivity System – a mobile and desktop website that evaluates users' social media presence to gauge their positive impact.

"A positive, never-give-up attitude has been a driving force for the Chevrolet brand for more than a century and has motivated us as a team to turn the impossible into the possible," said Tim Mahoney, chief marketing officer of Global Chevrolet. "We encourage people around the world to reflect on their own outlook by using the Global Positivity System and to consider the possibilities in their own lives."

Chevrolet sought to create a tool that could provide the most accurate snapshot of a user's social sentiment. In working with IBM to incorporate Watson's functionality – a first for the automaker – Chevy found the perfect solution to meet its goals.

"One of the key pillars of cognitive computing is the ability to surface valuable insights. People may use those in varying ways – to engage with a customer, to make a business decision, or to reveal hidden value," said Stephen Gold, vice president, IBM Watson. "What Chevy is doing with Watson enhances not just personal engagement, but also helps show customers the value they are delivering to others through positivity. It's a creative way of using technology to amplify a uniquely human attribute."

Using IBM's Watson Personality Insights and AlchemyLanguage APIs, Chevy's Global Positivity System is able to build a detailed personality snapshot for users that is based on multiple criteria, including a social media analysis to evaluate sentiment and a personality characteristic evaluation to help guide users toward activities for their next adventure.

The output also includes a score based on Watson Sentiment Analysis capability, which provides an interpretation of the positivity of users' Facebook and Twitter posts. Users can then share their score with each other via social media and compare it to the average of the Global Positivity System community. The platform will also identify each person's most positive and least positive posts, as well as their most frequently used positive words and Emojis.

Find New Roads

In addition to a positivity score and sentiment analysis, the snapshot highlights users' top three personality traits identified by Watson Personality Insights, such as excitement and self-expression. The site then

encourages users to Find New Roads that may appeal to their traits, such as touring a museum or taking on a new hobby. Pairing personality to possibility is just one way Chevrolet is driving positivity and around the globe.

Inspiring Positivity at the Pump

To demonstrate the Global Positivity System, Chevy took over three gas stations across the globe to inspire positivity among patrons. Visitors in Buenos Aires, Cape Town and New Orleans were given the chance to pay for gas with positivity by taking on the Chevy GPS experience. Each patron was given free gas based on their positivity score – the higher the score, the more free gas received.

The Chevy Global Positivity System is available at www.FindNewRoads.com in six languages: English, Spanish, Arabic, Korean, Portuguese and French Canadian.

About Chevrolet

Founded in 1911 in Detroit, Chevrolet is now one of the world's largest car brands, doing business in more than 115 countries and selling more than 4.0 million cars and trucks a year. Chevrolet provides customers with fuel-efficient vehicles that feature engaging performance, design that makes the heart beat, passive and active safety features and easy-to-use technology, all at a value. More information on Chevrolet models can be found at www.chevrolet.com.

About IBM Watson: Pioneering a New Era of Computing

Watson represents a new era in computing called cognitive computing, where systems understand the world the way humans do: through senses, learning, and experience. Watson continuously learns from previous interactions, gaining in value and knowledge over time. With the help of Watson, organizations are harnessing the power of cognitive computing to transform industries, help professionals do their jobs better, and solve important challenges.

As part of IBM's strategy to accelerate the growth of cognitive computing, Watson is open to the world, allowing a growing community of developers, students, entrepreneurs and tech enthusiasts to easily tap into the most advanced and diverse cognitive computing platform available today. Watson solutions are being built, used and deployed in more than 45 countries and across 20 different industries.
