

IBM Reveals New AI and Cloud Powered Fan Experiences for Wimbledon 2022

As the Official Technology Partner of The Championships for the past 33-years, IBM continues to accelerate innovation at Wimbledon and improve the digital fan experience

London, 21st June, 2022 - IBM (NYSE: IBM) and the All England Lawn Tennis Club today unveil new ways for Wimbledon fans around the world to experience The Championships digitally, powered by artificial intelligence (AI) running on IBM Cloud and hybrid cloud technologies. Co-created by the All England Club and IBM for Wimbledon.com and the Wimbledon app, the new features join a comprehensive suite of digital fan experiences - including the award-winning^[1] *IBM Power Index with Watson*, *IBM Match Insights with Watson* and *Personalised Recommendations* and *Highlights Reels* - all designed to help global audiences stay more informed and engaged with players, matches and the tournament.

New features for 2022 include:

- **‘Win Factors’ brings enhanced explainability to ‘Match Insights’:** Building on the existing Match Insights feature of the Wimbledon app and Wimbledon.com, IBM is providing an additional level of explainability into what factors are being analysed by the AI system to determine match insights and predictions. *Win Factors* will provide fans with an increased understanding of the elements affecting player performance, such as the IBM Power Index, court surface, ATP/WTa rankings, head-to-head, ratio of games won, net of sets won, recent performance, yearly success, and media punditry.

- **‘Have Your Say’ with a new interactive fan predictions feature:** For the first time, users can register their own predictions for match outcomes on the Wimbledon app and Wimbledon.com, through the *Have Your Say* feature. They can then compare their prediction with the aggregated predictions of other fans and the AI-powered *Likelihood to Win* predictions generated by IBM.

The Wimbledon digital features are underpinned by IBM Watson and leverage a hybrid cloud approach – using a combination of on-premises systems, private clouds, and IBM Cloud – enabling increased flexibility and efficiency. IBM Cloud provides the foundation and scalability for these digital experiences. It hosts and processes data from matches that is fed into AI models built using [IBM Watson Studio](#) and [IBM Watson Discovery](#) to produce insights for fans, commentators and media.

Alexandra Willis, Communications & Marketing Director, The All England Club, said: “Leveraging technology to help fans become more informed, engaged and involved throughout the Wimbledon Fortnight is at the core of our strategy to ensure we are leveraging innovation to keep Wimbledon relevant and deliver outstanding digital experiences for fans, wherever they may be. In partnership with IBM, we are thrilled to bring an even more dynamic and interactive digital experience to fans around the world this year as Wimbledon returns to full capacity. Core to these experiences is our ambition to help fans get closer to Wimbledon by understanding which players to follow and analyse, and inviting them to get involved with new match predictions and insights features, alongside our extensive scoring, news and video content across our channels.”

Kevin Farrar, Sports Partnership Leader, IBM UK & Ireland, said: “The digital fan features on the Wimbledon app and Wimbledon.com, beautifully designed by the IBM iX team and powered by AI and hybrid cloud technologies, are enabling the All England Club to immerse tennis lovers in the magic of The Championship, no matter where they are in the world. Sports fans love to debate and we’re excited to introduce a new tool this year to enable that by allowing people to register their own match predictions and compare them with predictions generated by Match Insights with Watson and those of other fans’.”

As the Official Technology Partner of The Championships for the past 33-years, IBM has developed solutions to modernise and streamline workloads, and delivered innovative digital experiences to engage sports fans around the world through [IBM iX](#), the experience design arm of IBM Consulting. Leveraging the same technologies IBM uses with businesses across industries and around the world, Wimbledon continues to accelerate innovation and improve the digital fan experience. The full suite of IBM-powered digital experiences on Wimbledon.com and the Wimbledon App includes:

IBM Power Index with IBM Watson

- An AI-powered analysis of player performance to help fans know who to follow beyond the most well-known, highly ranked players.
- Uses [IBM Watson Discovery](#) and IBM Cloud to analyse performance data, mine media commentary, and measure player momentum.
- Produces insights for fans including *Ones to Watch* and a *Likelihood to Win* probability.

IBM Match Insights with IBM Watson

- Uses AI to generate a player factsheet for main draw singles matches, surfacing player insights, presenting the IBM Power Index and winner predictions.
- Features an 'In the Media' section that leverages [IBM Watson Discovery](#) to extract key insights about players from trusted news sources.
- Includes a 'By the Numbers' section that uses open-source AI to translate historical match statistics into player insights.
- New this year - users can register their own predictions for match outcomes on the Wimbledon app and Wimbledon.com, through the *Have Your Say* feature.

Personalised Recommendations and Highlights Reels

- Once a fan has decided who to follow via the IBM Power Index, they can stay updated through a series of personalised recommendations and highlights reels.
- This enables fans to discover new players by making suggestions based on their current favoured players, the IBM Power Rankings, top players, country, and age.
- Includes links to other features such as the IBM Power Index Leaderboard and Match Insights with Watson. If you are registered with myWimbledon, you will receive personalised highlights based on the players you are following.

The Championships, Wimbledon will run from June 27 - July 10, 2022. To see the technology in action, visit [Wimbledon.com](https://www.wimbledon.com) or download the Wimbledon app on your mobile device, available on the App Store and Google Play Store.
